- **Commander, Navy Installations Command (CINCLAN)**

Clinical Testing

We are a full-service laboratory with state-of-the-art equipment to address a variety of clinical testing including chemical, microbiology and upper respiratory testing.

Environmental Testing

Drinking water should be free of contaminants and meet quality standards, while storm water should be diverted and managed to prevent flooding and pollution, and waste water should be properly treated to remove contaminants before release into the environment.

Food Testing

We provide comprehensive testing services to ensure the safety and quality of food products in a wide range of industries, including agriculture, manufacturing, food service, hospitality, retail, and more. Our food testing services are designed to identify potential hazards. We use state-of-the-art laboratory equipment and advanced testing methods to quickly identify any potential problems and provide accurate results.

CAPABILITY STATEMENT

Black Labs

ABOUT US

Black Labs is a Service-Disabled Veteran Owned Small Business, located in Tucson, Arizona. We are an ISO 17025:2017 accredited laboratory that provides a wide range of services from Environmental Health, Food Safety, IT Services, Veterinarian Services and Testing services across the country. Our lab equipment, facilities and protocols were carefully designed and are meticulously maintained to ensure an extremely high level of accuracy and consistency in our results. Beyond counting on superior testing, clients work with Black Labs because we are a true lab partner. When tests identify contaminants or any other unexpected results, we work with clients to help identify the source and determine how to best improve their systems and processes. Regular clients receive this consulting support from our lab experts at no additional charge.
